

Fraud Investigation Report

Alert ID: 43

Risk Level: HIGH

Summary

The sender account b9c59b15-d76c-458f-9c8a-dd4b7c21060a has executed seven transactions, three of which are flagged. Two flagged transfers of \$4,000,000,000 each (ids 42 and 43) to the same receiver account, plus an earlier \$4,000,000,000 transfer to a different account, suggest a pattern of unusually large, suspicious activity. The account's baseline risk score is 35, but the presence of multiple flagged high-value transactions raises the overall risk to a high level.

Recommendation

Immediately freeze the sender account, conduct a forensic review of all associated transactions, and notify the compliance and legal teams. If further evidence of illicit activity is confirmed, consider reporting the case to the relevant law enforcement authorities.
